ASTRONOMERS say that their science can be practically studied under our clear at-mosphere to better advantage than from the observatories of middle Europe. A CARRIER-PIGEON arrived in Bridgeport.

Conn., recently from a steamer off Cape Hatteras, which had a party of Bridgeport people on board bound for Florida. EACH Chinese family in California must have an idol to worship, and where they can't get a regular one they worship the tea-kettle, spider, or the leg of a bedstead.

CHINA is offered an outlet for its surplus population, and notwithstanding its tecning millions, the supply is likely to be exhausted before the demand. It is proposed hausted before the demand. It is proposed to build the Canadian Pacific Railroad with

business early and late; who accosts the merchant in his shop, the scholar in his study, the lawyer in his office, the lady at her breakfast table; who can be in a thous-and places at once, and speak to a million people every morning, saying to each one the best thing in the best manner.—Row

About 11 o'clock Friday night a police-Magurt 10 clock Friday night a policeman met a negro carrying a trunk along Lafayette street, and thinking he had discovered an item he collared the negro and told him to drop that trunk and explain. "I kin do it, sah," replied the stranger, as he put the trunk down. "De family what was boarding me has been axing for mongroduces. For irritation of the bowels may produce apiasia, and we should be

mals live when their medulia is removed.

The mind has little power over the body as night of his death he was heard breathing sterterously, and efforts to arouse him being vain, he was taken to the sick hay. His pupils were insensible to the light, and his rules heat fachly. He died in two or and not at all in performing the move-

had sort of fellow after all. On the other hand—this was Whateley's theory—women were extremely sensitive as to the general fiber is needed to transmit each other from character of their sex, while quite ready to join in cutting up the sisterhood in detail.

there is an alternation of cold, warm, rainy, and foggy days, it is worth while to know that the Medical Record cites a number of cases in which borax has proved a most effectual remedy in certain forms of colds. In sudden hoarsene s or loss of voice from colds, speakers and singers have often obtained relief by slowly dissolving and partially swallowing a lump of borax the size of a pea before speaking or singing. This produces a profuse secretion of saliva, or "watering" of the mouth and throat, probably restoring the voice or tone to the dried vocal cords, just as "wetting" before the dried vocal DURING this changeable season, when

THE Young Men's Christian Association of Baltimore have had a special meeting to decide whether money donated by Col. Sinn, a well-known gambler, should to Executive Committee of the Association had instructed cluding stores, factories, churches, school mittee of the Association had instructed the Financial Secretary to return the money, and a resolution was introduced to rescind the action of the committee. One member said the money came accom-panied by the tears of women who were worse than widows and of children who mittee of the Association had instructed the Financial Secretary to return the money, and a resolution was introduced to rescind the action of the committee.

One member said the money came accompanied by the tears of women who were worse than widows, and of children who were worse than orpha's. Another thought that taking money from gamblers was brin ing them a step negret to Christ.

bill, all he possessed. Going to one of our leading stores he invested in a large pocket-book, price fifty cents. In this book he placed his \$4.50, shoved it down to the bottom of his pocket, and looked wise. Occasionally he would purchase some little triffe, pulling out his pocket-book and paying for each article as it was wrapped up. About a half hour intervened between each purchase. After staying in the store cach purchase. After staying in the store will all be collected, and other bosh. Once they commenced a suit in the Circuit all its cash; after another half-hour's rest, he called the clerk aside and swapped his new pocket-book off for two pounds of pocket-book off for two pounds of ed candy; this he sat down and ate up, and went home a more complete bankrupt than Jay Cooke & Co.—Brookhaven

Is the range of mountains in Western April 1987. North Carolina, known as the "Fox the Range," a most singular phenomenon exists. It is a "breathing cave." In the summer months a current of air comes with from it so strongly that a person can't walk against it, while in winter the sucwalk against it, while in winter the from tion is just as great. The cool air from the mountain is felt for miles, in a direct the mountain is felt for miles, in a direct the mountain is felt for miles. the mountain is felt for miles, in a direct line from the mouth of the cave. At times a most unpleasant odor is emitted upon the current from dead carcasses of animals sucked in and killed by the violence.

The loss of cattle and stock in that section The loss of cattle and stock in that section To hear Miss Blodgett say To hear Miss Blodgett say To hear Miss Blodgett say The tempher discovered They range too near the mouth of the cave, and the current carris them in. At times, when the change from inhalation to exhalation begins, the air is filled with v rious hairs of dead animals; not unfrequently bones and whole careasses are found miles from the place. The air has been known to change materially in temperature during exhalation from quite cool in manufaceasmity hot, withering vegetation in manufaceasmity hot, withering vegetation is manufaceasmity hot, withering vegetation in manufaceasmity hot, withering vegetation is manufaceasmity hot, withering vegetation in manufaceasmity hot, withering vegetation is manufaceasmity hot, withering vegetation in manufaceasmity hot, withering vegetation in manufaceasmity hot, withering vegetation is manufaceasmity hot, withering vegetation in manufaceasmity hot air, which can muritions substitute for wheaten bread; and the genuine article is indicated in muritions substitute for wheaten bread; and the genuine article is indicated in muritions substitute for wheaten bread; and muritions substitute for wheaten bread; and the genuine article is indicated in muritions substitute for wheaten bread; and the genuine article is rooms are warmed by hot air, which can murition substitute for wheaten bread; and muritions are warmed by hot air, which genuin. may produce aphasia, and we should be unwilling to seat the mental act in speaking in the bowels. Tickle the feet and the muscles of the face contract, but we do not assume that the seat of will for those musgo on.—Detroit Free Press.

In the British medical naval report just issued, a fatal case of poisoning by tobacco is mentioned. A boy on the Implacable had frequently been reproved for chewing tobacco, and on several occasions swallowed pieces to prevent detection. On the his pulse beat feebly. He died in two or three minutes after. Two small pleces of tobacco were found in his stomach.

Interior consists only in pointing an end, and not at all in performing the movements it has indicated. A great many facts go to show that when the will has given ARCHBISHOP WHATELEY used to hold that there was one characteristic distinction between men and women. When men, he said, were spoken of disparagingly as a whole, they were apt to coincide; but when any particular man was attacked, they usually stood up for hun, and did seems to indicated. A great many lacts go to show that when the will has given an organ something to do that thing is done without further trouble to the will, as a telegraphic dispatch has been sent and done with. And the fact that when almost all the fibers of the medulla oblongata are destroyed sense and motion may be perfect seems to indicate that the assignment of the property lly stood up for him, and did seems to indicate that the commutelegraph for which I the

Farmers' Insurance.

surance Company. This was limited to two towns in territory, and \$1,200 in a single risk, and existed only by the honor woite or tone to the dried vocal cords, just single risk, and existed only by the honor as "wetting" brings back the missing notes to a flute when it is dry.

Men's Christian Associa-are have had a special meet-tained a charter, and extended their limits was brin ing them a step nearer to Christ, Mr. J. D. Johnson argued that gambling was not forbidden in the Bible. The association voted to return the money to Sinn.

A GAWKY individual, age about twenty, from the backwoods, came to town yesterday. In his pants pocket was a five-dollar bill, all he possessed. Going to one of our leading stores he invested in a large pock.

The assured have saved for themselves

they commenced a suit in the Circuit Court, but backed out, being satisfied that the farmers, like Jeff. Thompson, "did not scare worth a cent."

So much for co-operation in this direc-tion; and our laws now admit of just such tion; and our laws now admit of just such organization all over the State, under a general law. And is it not foolish for the agricultural districts to put themselves at the mercy of city conflagrations, which they virtually do by insuring in the stock companies and paying their rates, which, with the most favorable classification, is greatly against the farmer, as the experi-ence of this company shows.

The teacher discovered the rhyme, and

hie roaring, gurgling sound, as a pot boil-ing. It is feared by many that a volcanic cruption may break forth there some time. Such things have occurred in places as lit-pots of plants, but is also a specific against worms in the soil.

Some Facts about Indian Corn.

As the question of cheap transportation hold, when it is remembered that the econ-

in the proportion of seventy-seven to nineof money, a little less than halt the nutriment we obtain when we buy corn. From 1847 to 1873, inclusive, the export

quantity of corn equaled 251, 450,000 bushels, valued at \$198,500,400. During this Sils,000,000 barrels, valued at over of the first fifteen consecutive years, was \$1.31 per bushel, and corn 71 cents per bushel. The annual average value to the remaining consecutive years was, wheat \$1.37 per bushel, and corn 72 cents per bushel. The annual average was the surrounding fruit, and do not drop out and cause a hole.

A SPACE CONE.—One of the prettier objects I ever beheld is a sprace cone, filled with sami and grass-seed, which sprouted with sami and grass-seed, which sprouted with sami and grass-seed, which sprouted and grew out of the scales. It is now as large as a cocommut with the husk on, and of the best portraits of the Russian Princess, whose recent marriage to the Duke of Edinburg is so magnificently eclebrated.

I be disputed of at their represents her as playing on one of these popular American organs.

The quantity exported from here last year was 27,856,397 bushels, against 13,290,179 bushels in 1872. Pursuing the subject still further, we find a discrepancy in the figures respecting the corn crop for 1872 and 1873, as given by the Government statistician, and the National Crop Reporter. er. The estimates upon the nine grain-growing States, based on the reports from product of corn, 755,920,260 bushels, show an average loss equal to 241,307,365 bushels, as compared with 1872, while the Govern-ment statistician estimates the total crop at 523,000,000 bushels, against 801,000,000 in rive to it a fairer food value and importance. In this connection, we notice that

sales of the cereal for eash in May next, are at rates ten cents higher per bushel than those now existing. The cause of the wide disparity in the prices of corn and wheat is determined. primarily, by the supply and demand; but there are other reasons. Wheat for bread is relished by the greater portion of the human family, and it has been only after much persistent effort that corn has been introduced among the people of the North-ern and Central European countries. Skill and enterprise of American citizens devised means for the safe transshipment of corn, and its preparation in a manner accept-able to the tastes of Germans, Englishmen. and others; and, no doubt, when Europeans acquire the skill in preserving it, as is the case with Americans, the people of Europe will reckon corn among the most relishable articles of aliment. It was as long ago as 1855 that the Government of Prussia caused a series of experiments to be made with corn. At that time Baron Gerolt, the minister resident of his Gov-ernment at Washington, sent a quantity of meal home, but the stuff soured before it reached the hands of the agents to test it. Other quantities sent were reduced to the fineness of flour, and thus spoiled, the parties not knowing how to use it. The introduction of corn, in any shape, into Germany, has a long and ludicrous history; but now corn-cakes and delicacies made from the cereal are to be found not only upon the King's table, but upon the ard of the humblest hamlet in the In England and France delicacies for the table made of corn, with eggs, milk, but-ter and cream, are now becoming articles of domestic manufacture there. All this seems strange, however, when we read of farmers in the West using corn for fuel, as an economical measure, or wheeling it, shelled, to market for fifty or fifty-five cents per bushel, where wheat, at the same and in the same localities, commands \$1,15 or \$1.20 per bushel. But the mo-ment corn reaches the railroad-track its price is enhanced; and, by the time it reaches the scaboard, it advances to a figure somewhere in the nineties, the difference being made up in freightage, etc. Hence there is a growing disposition among the producers of the cereal to turn their corn into pork, from which they can realize six or seven cents per pound, dead weight, in a ready market. reaches the seaboard, it advances to a fig-

A LITTLE urchin, seven or eight years old, in a school where a Miss Blodgett was teacher, composed the following and wrote it on his slate at prayer time, to the great amusement of the boys:

There is no doubt but that the people of Northern and Central Europe can be fed with American corn at a much lower rate than they are now being fed with amusement of the boys:

A great amount of labor goes in an Engrate than they are now being fed with the same of the boys and exporter. The subject is no doubt but that the people of Northern and Central Europe can be fed with American good profits both to the producer and exporter. The subject is no doubt but that the people of Northern and Central Europe can be fed with American good profits both to the producer and exporter. Black Leg in Calves.

This disease is of very frequent occurrence among young cattle, and especially among those which are in the most thrifty condition. It is a blood disease, resulting from plethora, or redundancy, blood being formed more rapidly than it can be approprinted by the growing animal. The symptoms are costiveness and deficient and high-colored urine; general excite ment of the system, hot mouth, red eyes, and rapid breathing. These are followed by lameness, an increased rapidity of the respiration, bloodshot eyes, and a stiff and protruding attitude of the neck and head. After this, swellings, which crackle when the hand is passed over them, occur upon the sides, and quarters, or legs. Up to his stage care is possible and even probable, but when the animal can no longer stand, and the extremities become cold,

there is no hope,

The treatment, which should be instant upon the first appearance of the disease, consists of a seton in the dewlap, a brisk purge of half a pound of Epsom salts dissolved in water, sweetened with molasses, and with a teaspoonful of ginger added. The feed should be very moderate, either of hay or out-straw, or a rather poor pasture, until the animal is reduced in condi-Young stock that are in hould be removed at once to a high. thin pasture and receive each day half an ounce of saltpetre and one ounce of flowers of sulphur, mixed with molasplaced upon the tongue .- N. days, it a member of the household be-came indisposed, the family-head, under instructions from the gray-haired dame, went to the forest or the field, to gather whole through a fine sieve upon the oy-ters, cover thickly with tresh bread crumts-and brown in a quick oven,—Garmantown and brown in a quick oven,—Garmantown made invigorating extracts, which ere Milk for Children.—Dr. Gardner, in many days brought the patient safely around, and saw the family gathering MILK FOR CHILDREN.—Dr. days aggrests that the Popular Science Monthly, suggests that once more without a missing member young children should be fest on the milk once more without a missing member to the property of the slightest indisposition." Will be the slight of of a farrow cow, since it has not been de-prived of its essential ingredients to nour-ish the year's calf. "If any one questions the effect of double attempt at nutration, examines the tongue, looks very grave, If you are ill, try the great herbalistic remedy, Dr. J. WALKER'S VINEGAR BITTERS.

Mason & Hamlin Cabinet Organs in

These instruments are making their excellence known to the sovereigns of Europe through the center of the fruit, the other cands of which fibers, though closely surrounded and pressed by the fruit, do not adhere to it. When the stalk is grated away, these fibers, having lost their hold, gradual-

R. V. PIERCE, M. D.:

Bear Sir—Your favor is just received. I intended to have written to you several weeks since concerning the improvement in my health, which is now very apparent. I have used one bottle of Favorite Prescription with the best results, although I will admit I was somewhat discouraged after its use (for a short time only). I took it under very disadvantageous circumstances—having the supervantageous circumstances—having the super vision of the house and during the season o "house cleaning" I was obliged through the able to be in no hurry in getting grain intermarket; the exception is caused by the expected demand in the spring and summer for all the corn and wheat we may have to land, and did all I could to bring "order out of choice,"—but mean larger saids all eachs. counties producing 44 per cent, of the total product of corn, 755,920,260 bushels, show an average loss equal to 241,307,365 bushels, as compared with 1872, while the Government statistician activates the Government of the symptoms of which I was a compared with 1872, while the Government statistician activates the Government of the symptoms of which I was a compared with 1872, while the Government of the symptoms of which I was a compared with 1872, while the Government of the symptoms of which I was a compared with 1872, while the Government of the symptoms of which I was a compared with 1872, while the Government of the symptoms of which I was a general rule we have advocated the sale of the continuing the remedy I find after using the continuing t handily get them into the market—for not-withstanding all the care that can be be-stowed by the raiser, the losses by vermin. I have suffered terribly and what added to my distress was the consciousness of not procur-529,000,000 bushels, against 801,000,000 in the previous year. Subsequent information, founded upon reliable data, would seem to corroborate the figures given by the National Crop Reporter. This apparent decrease in the crop, and the prospective foreign demand, coupled with the fact that there is an uncertainty existing respecting the surplus quantity of wheat in the country for foreign exportation, ranging from L 000,000 bushels to 30,000,000 bushels to 30

VINECARBITTE

NECAR BITTERS Dr. J. Walker's California Vinerar Bitters are a purely Vegetable effy from the nareparation, made chi e herbs found on the lower ranges of e Sierra Nevada mountains of Califor. ma, the medicinal properties of which re extracted therefrom without the usof Alcohol. The question is almost single sked. What is the cause of the mpa alleled success of VINEGAR BIT reas?" Our answer is, that they remore the cause of disease, and the patient re-covers his health. They are the great osal purifier and a life-giving principle,

sick of every disease man is heir to. They are a gentle Purgative as well as a Tone, relieving Congestion or Inflammation of the Liver and Visceral Organs, in Billons The properties of Dr. WALKER'S VINEOAN BUTTERS are Apericut, Diaphoretic, Carminative, Nutritions, Laxative, Diaretic, Schative, Counter-Irritant, Sudorific, Alterative, and Anti-Bilious.
